

RELIGHT YOUR PASSION TO FIGHT ENERGY POVERTY!

Dear Friend,

As we embrace the arrival of fall, many of us look forward to the special joys this season brings. Children dressing up and begging at our doors, rallying behind our favorite football teams, and gathering with friends and family around delicious feasts.

However, for the billions of people who live in energy poverty, the equinox is a time of concern. As days get shorter, will there be enough daylight to work and do the activities essential for sustaining life?

As a supporter of our mission to eradicate energy poverty, you understand the importance of our cause. You know it's not just about providing electricity; it's about empowering communities, enhancing education, improving health care, and ultimately building a more equitable world.

Therefore, Solar Under the Sun invites you to renew your commitment to tip the scales toward a brighter future. Here's how you can make a meaningful impact:

- 1) **Pray:** We are promised that our prayers will be heard if we seek God with all our hearts. Please put us on your daily prayer lists at home and at church.
- 2) **Come (back) to solar school:** Solar school is a beacon of knowledge and empowerment. Whether you are technical or non-technical, we welcome you to learn, grow, and become a champion for those in energy poverty.
- 3) **Volunteer** here or abroad: If you can, consider joining us on-site for an installation project. There is nothing quite like witnessing the immediate impact of your efforts. However, your expertise is equally valuable in between trips or if you cannot travel right now. We greatly appreciate and need people with diverse backgrounds and skills such as social media, marketing, organizational growth, data crunching, and more.
- 4) **Spread the word:** even in your day-to-day life, you can make a difference. Advocate for our cause both online and in your community. Share our mission with your friends, family, and colleagues. Awareness is the first step toward finding solutions.
- 5) **Donate:** your financial support can help us reach more communities in need and change lives. Even a small contribution can make a significant difference.

Remember, each solar student and panel represents hope, potential, and a brighter future. Together, we are not just providing electricity; we are empowering communities to rise above energy poverty and embrace new opportunities.

So, this fall equinox, let's reignite the spark within us and continue our transformative journey. Your dedication matters, and your involvement can shape the destiny of those who dream of a world lit by solar power.

Thank you for being a beacon of light in the lives of others,
Blessings,

Ruth Dwyer
