

How You Can Help

Solar Under the Sun works with churches and service organizations. You can help in a number of ways.

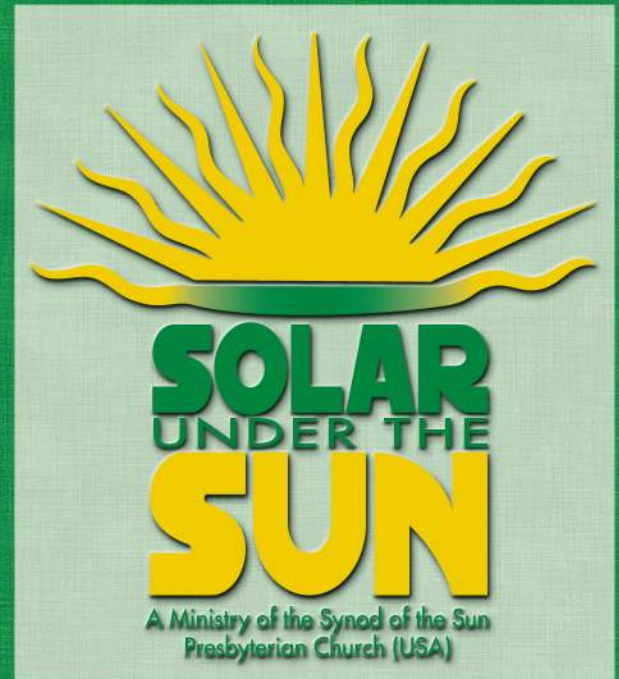

- **Pray** for our work, that it might meet the needs of people to the glory of God.
- **Contribute** financially to this exciting project so that solar power may be shared with those in need.
- **Volunteer** for training to install solar power systems in places like Haiti, and join with others from your congregation or community participating in the program.
- **Visit** www.solarunderthesun.org to learn more.
- **Share** this information with your friends, family, and fellow church members so that they, too, may join in this rewarding effort.

Together we can
light the world.

6100 Colwell, Suite 200
Irving, Texas 75039

Help us **light** the world.

From Clean Energy to Clean Water and Beyond

Solar Under the Sun, a new ministry of the Synod of the Sun, Presbyterian Church (USA), is designed to provide solar power to nonprofit groups—no matter where they might be—to help them alleviate hardship while also becoming better stewards of God's green earth. As Christians, we can join together with those in need to share both the power of the sun and the grace of the risen Son.

Solar Under the Sun is initially working in partnership with the Synod of Living Waters to augment the **Living Waters for the World** (LWW) program. LWW constructs simple but effective water treatment facilities. Most of these facilities, however, get their electricity from gasoline-powered generators. The ability to operate for even a few hours a day on solar-produced electricity saves money on fuel and protects against shortages. This also spreads the use of clean, renewable power—an outreach in and of itself.

Installation of a solar panel in Haiti.

Our Place Under the Sun

Training for **Solar Under the Sun** is located at Ferncliff Camp and Conference Center near Little Rock, Arkansas. Ferncliff is already home to a Church World Service warehouse and a Presbyterian Disaster Assistance call center. Its accommodations and infrastructure make **Solar Under the Sun** a natural fit. Our first classes at Ferncliff are planned for May 2010.

In the Beginning ... Everything Has to Start Somewhere

Our initial focus is threefold:

- **Provide training** in partnership development, spiritual education, and solar power installation, operation, and maintenance
- **Offer direction** in obtaining materials and supplies at cost when available and using in-country supplies whenever possible
- **Establish relationships** among those in need of electrical power, the Synods of the Sun and Living Waters, other PC(USA) and ecumenical mission efforts, those experienced in the uses of solar power, and individuals and organizations that feel called to this ministry

Eventually, **Solar Under the Sun** will also help provide electricity for everything from remote schools and health clinics, to irrigation pumps, to cell phones for reliable communication.

“From the rising of the sun to its setting the name of the Lord is to be praised.”

Psalm 113:3
